

# AIRLIFE OPEN™ OXYGEN MASK

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE | DEHP FREE

AirLife Open™ can effectively deliver oxygen to patients, while remaining comfortable to wear and allowing patients to still undertake normal activities such as drinking or talking. It reduces waste as fewer interfaces are needed. Due to the open design it can be used with an endoscope or bronchoscope. All of these features improve the standard of care while not compromising safety or quality.

## THE AIRLIFE OPEN™ IS DESIGNED TO:

- Allow the patient to engage in normal activities such as drinking or talking
- Allow access for endoscopy and bronchoscopy procedures when needed
- Reduce waste and save time with fewer interfaces
- Allow for easy transfer of patients between areas of care
- Give clinicians the ability to adjust oxygen delivery without disturbing the patient
- Allow the patient to continue with everyday tasks and make their recovery much more comfortable
- Work in Post Op recovery, Emergency, Labor and Delivery
